Site and Physical Planning

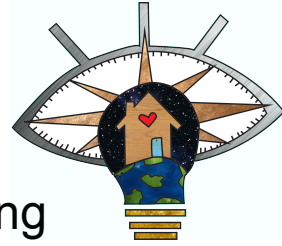

The design will be on ground level in the North East corner. So if you're walking into the Eco Village it's the farthest right side corner. It's under the seating area on the walkway, and to the right of the opening between the complex.

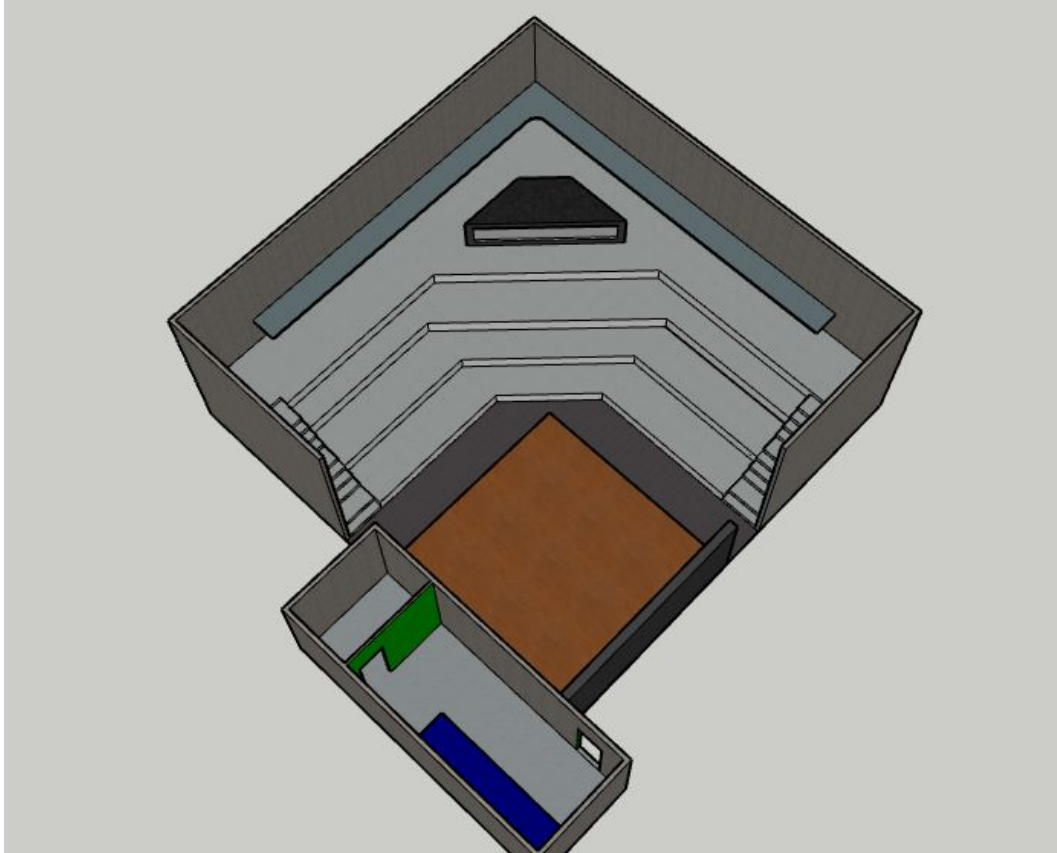

Floorplan

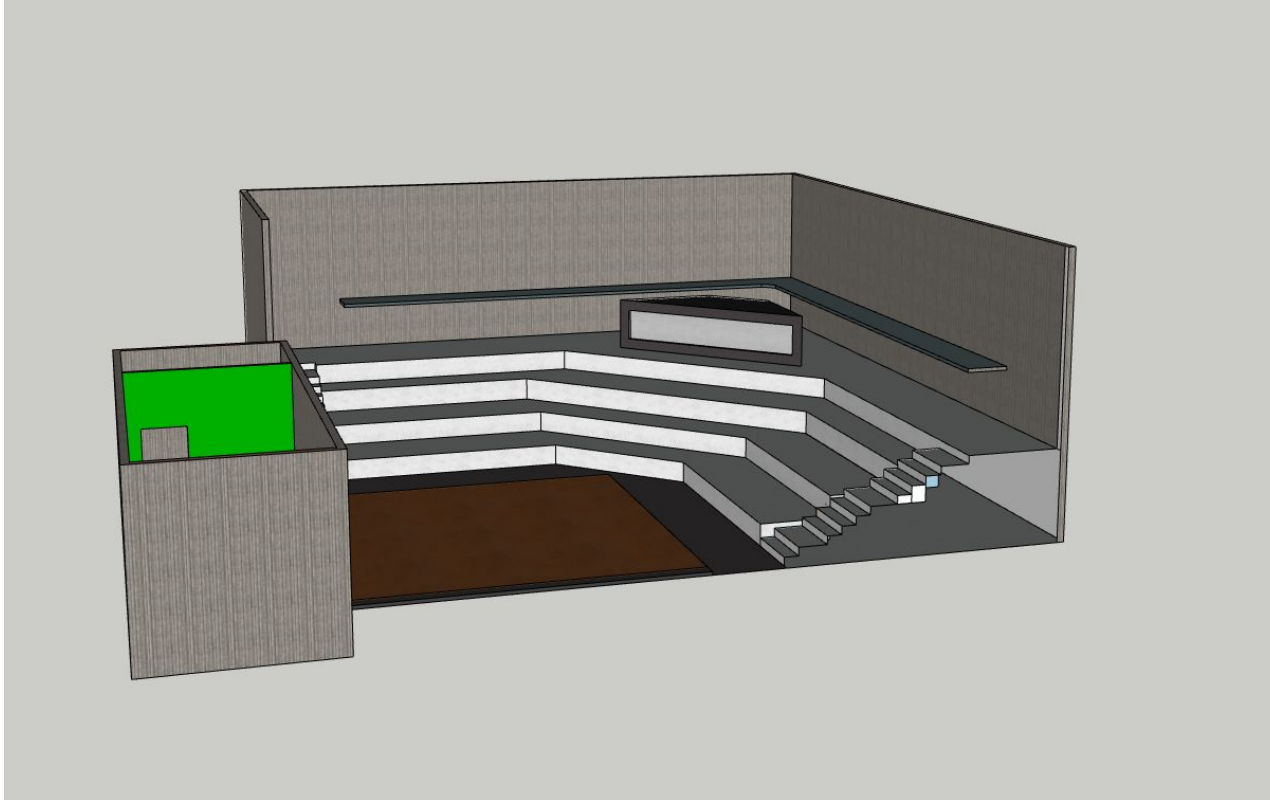

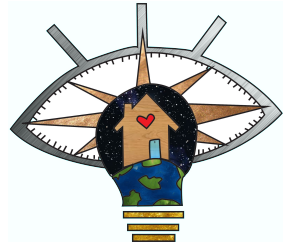

Our design comes with everything necessary and needed with an amphitheatre, our artist Chris Warren talked about green rooms, wood stages, and visual aspects that come into play with the orientation of our space. The seats of the amphitheatre were redesigned to fit the 4'x8' panels that we originally didn't know were going to be used for it.
